*This Resource Guide is updated yearly. Check the WCBHB website for more frequent updates at www.wcbhb.org or “like” the Recovery Is Beautiful Facebook page.

The Mental Health Resource Guide began as a project of Washington County Family & Children First Council’s “Access to Mental Health Initiative.” A stakeholder’s group convened and determined that information about existing mental health resources would be valuable. A Core Team developed the following mission and vision statements:

MISSION STATEMENT

The mission of the “Access to Mental Health Initiative” is to improve access to available mental health services for Washington County residents.

VISION STATEMENT

All residents of Washington County, seeking or in need of mental health services, shall have available complete and accurate resource information to better access services.

The Mental Health and Substance Use Resource Guide, which will be updated annually, may be reproduced and can be found on the Washington County Behavioral Health website at

www.wcbhb.org

For questions or to provide additional or corrected information for this guide, please contact the Behavioral Health Board office at 740-374-6990

Data provided is for informational purposes only, and does not imply endorsement, fitness for use, legal sanction or license, nor in any way seeks to portray anything other than information upon which individuals may freely choose to engage the provider or its intermediaries in seeking desired services. Users of the information should understand that a provider being listed does not guarantee service availability or service delivery to the user and in no way constitutes legal referral.

The following are some of the signs and symptoms of mental illness:

- Feeling sad, down, hopeless and helpless
- Problems with speech, logical thinking, concentration or memory not explained by any physical conditions
- Feeling disconnected from people and events
- Detachment from reality (delusions), paranoia or hallucinations
- Significant tiredness and low energy OR excessive energy and hyperactivity
- Feeling unable to cope with problems and stress
- Paranoia, fear or suspiciousness of other people; anxiety
- Trouble understanding and relating to situations and to people
- Alcohol or drug abuse
- Major changes in eating habits, personal hygiene and/or sleeping habits
- Unusual or peculiar behavior
- Excessive anger, hostility or violence
- Thinking about suicide
- Unexplained physical discomforts, such as stomach ache, back pain or headache

Having one or two of these symptoms does not necessarily mean a person has a mental disorder. *However*, if someone is experiencing several of these symptoms, and they are interfering with the individual's ability to perform everyday tasks or take care of normal responsibilities, seeking behavioral health services can make a difference in that person's quality of life.

The following are some of the signs and symptoms of substance use disorder:

- Feeling that you have to use the drug regularly
- Having intense urges for the drug that block out any other thoughts
- Over time, needing more of the drug to get the same effect
- Being secretive about the use of the substance
- Not meeting obligations, work and/or personal responsibilities

Substance Use & Mental Health Service Providers

(*Contract agencies of the Washington County Behavioral Health Board that offer a sliding fee scale)
